

**为什么不能投喂动物?**  
 Why shouldn't we feed the animals in the zoo?

动物有营养均衡的食谱, 投喂的额外食物会导致消化不良。人类喜爱的食物很多动物都不能消化。  
 Most zoo animals can't eat direct human food. Zookeepers ensure that animals receive a balanced diet.

“病从口入”, 不同的手、不同的食物会向动物传播病菌。  
 Feeding the animals can spread disease and make them sick.

**爱我就不要喂我**  
 Love me, please don't feed me!

在展区里, 您会看到类似这样的说明牌, 请不要错过了解动物和亲近它们的机会哦!

Watch for signs in the zoo that say, "Don't miss the opportunity to know about me and get close to me."

- 鸟类动物区域 (Birds)
- 灵长类动物区域 (Primates)
- 食草类动物区域 (Herbivores)
- 食肉类动物区域 (Carnivores)
- 两栖爬行动物区域 (Amphibians)
